

ABDULLAH MOHAMMED SULIMAN

Full-Stack Developer (PHP)

Sana'a, Yemen • +967 779987481 • abduh360allah@gmail.com

As a passionate and driven Full Stack Developer, I am focused on building dynamic web applications and managing database systems, from front-end to back-end. I am committed to overcoming technical challenges, optimizing system performance, and working collaboratively to deliver top-quality solutions. With a strong desire to succeed and grow, I am eager to contribute my skills and stay ahead in the rapidly changing tech industry.

Projects

Student Tracking System

4/2025

- Technologies Used: PHP, Laravel, MySQL, HTML, Bootstrap.
- Developed a system for **Azal Modern School** to track and manage student information, including attendance, grades, evaluations, and academic activities.
- Features include student data management, grade tracking, and automated notifications for academic events.

E-commerce Web Site Project

- 8/2023
- Designed and developed a fully functional e-commerce platform using PHP, MySQL, HTML, and CSS.
- Implemented essential features such as product listings, shopping cart functionality, and order management systems. Optimized database queries to enhance performance and scalability.

Chat Application
